Profile Summary

Highly skilled and user-centered front-end developer skilled in working with UX and design teams to develop the frontend designs for website and applications. Experienced in building multi-platform websites using Responsive Web Design.

Area of Expertise

Responsive Web Design: dynamically altering a website's look to match the size and orientation of the device used to view it.

DOM Manipulation: able to interact and manipulate the structure, and the content of any web document, including its styles and HTML sections.

Problem Solving: ability to identify issues, come up with and evaluate solutions, and then put the best ones into action.

Project Accomplishment

- I developed a personal website from scratch with HTML, CSS and Javascript.
- I was able to create and develop a web app called RANdOMe, an app that displays random memes, jokes, quotes and riddles, all with HTML, CSS and JavaScript.

Interpersonal Skills

Time Management: have the skills to make the most of my time to produce results that are successful.

Efficient and Effective communication skill.

Assertive, Innovative, long-range thinker.

Team Player.
